CORNER CAP				
EFA 75	75 x 75 mm	2 metres	10 x 2 metres	Black only
WELDING ROD				
		100 metres coil	100 metres coil*	Colours to match vinyl sheet flooring
Supplied in colours that match our sheet flooring, this allows for seams to match or contrast with the floor finish. Welding Rod is used to produce hygienic, continuous floors.				

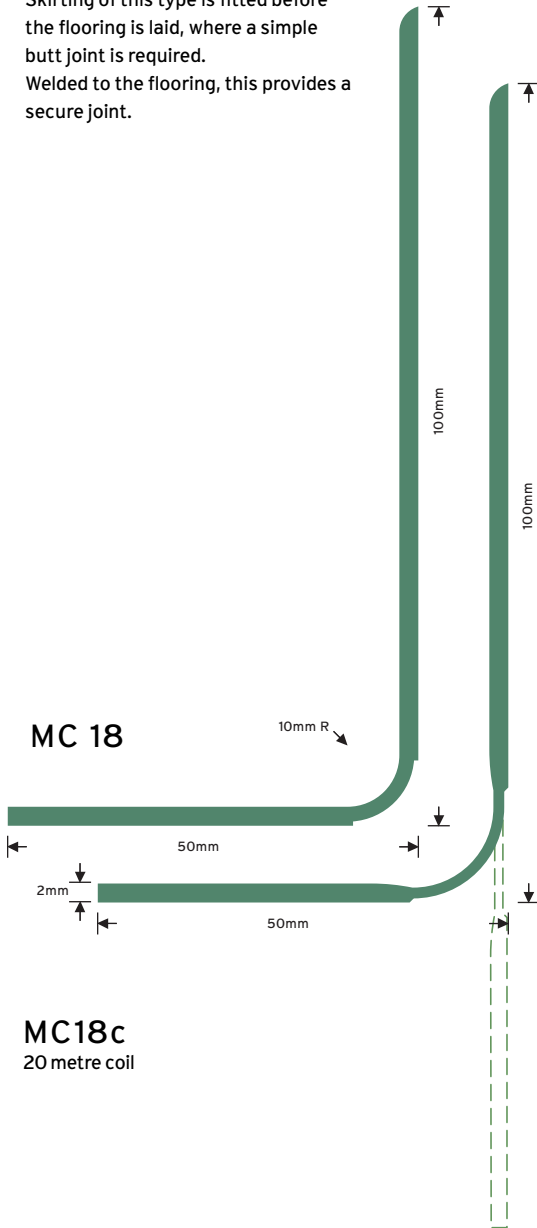

Special colours subject to a minimum order of 500 linear metres(excludes CS, CT, EFA 75, CF). *Supplied in standard packs only.

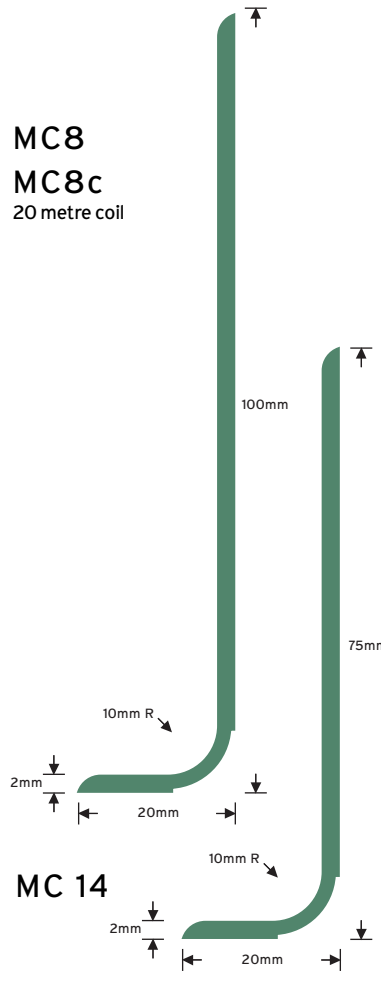

SET-IN COVERED SKIRTING

Skirting of this type is fitted before the flooring is laid, where a simple butt joint is required. Welded to the flooring, this provides a secure joint.

SIT-ON COVERED SKIRTING

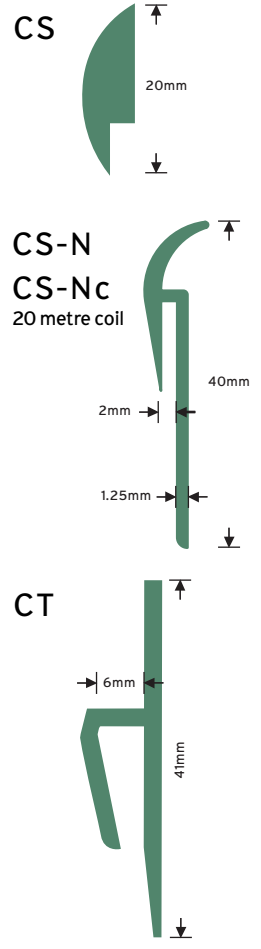

Sit-on coving is fitted after the flooring has been laid, and can therefore be used to replace an old skirting, as well as to provide a neat finish to a new floor. These tough and durable covings give protection to the wall decorations at floor level. Ejecta skirting is easy to clean, needs no painting, and offers long-term maintenance savings compared to timber skirting.

CAPPING STRIP

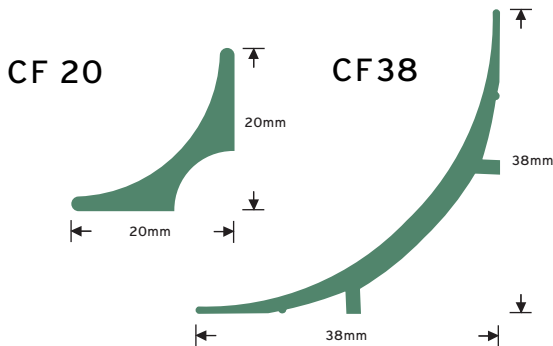

Capping Strip gives a neat finish to the installation and ensures a continuous, sealed surface.

The benefits of a sealed, easily maintained surface are invaluable in hospitals and other similar locations where hygiene is of paramount importance.

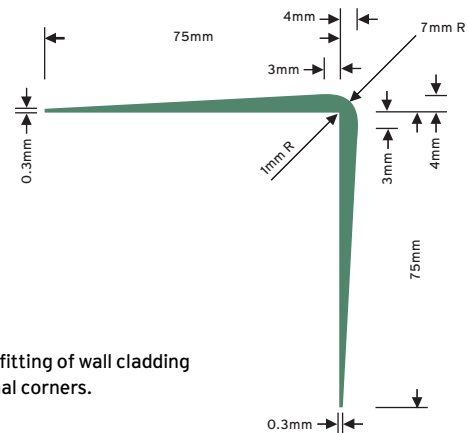

COVE FORMER

Where ease of maintenance and hygiene are important, sheet flooring may be taken up the wall, having created a radius using our Cove Former.

CORNER CAP

EFA 75
For use in the fitting of wall cladding around external corners.
